

2X BUILD CJC 1295 / IPAMORELIN

Description:

CJC-1295 + Ipamorelin work together to boost natural growth hormone (GH) production. **CJC-1295** steadily increases GH levels over time, while **Ipamorelin** triggers short bursts of release without disrupting other hormones.

Benefits:

Supports muscle growth, fat loss, recovery, and healthy aging without disrupting other hormones.

Side Effects:

It is important that you follow the dose and administration instructions as listed. You may experience mild injection site redness or tenderness, temporary flushing, increased hunger, or fatigue. Rarely, headaches or water retention. If any of these symptoms become severe, contact us and let the medical team know.

IMPORTANT

1-3 months ON, 1 Month OFF

PM before bed or AM fasted and PM on empty stomach

5 days on 2 days off (1-2x per day)

Inject 5-10 units, SQ
• Start with 5 units

Refrigerate

Injection Site:

Use an alcohol swab on the top of the vial and at the site of injection before use. Work in a clockwise fashion around the belly button to ensure the prior injection sites have healed, avoiding tender areas. Other subcutaneous area shown to the left.
