

2X LEAN TESAMORELIN / IPAMORELIN

Description:

Tesamorelin and Ipamorelin work together to increase natural growth hormone (GH) release. **Tesamorelin** activates the body's GHRH pathway and is specifically known for reducing visceral (deep abdominal) fat by improving fat metabolism, while **Ipamorelin** creates gentle GH pulses without disrupting other hormones. Together, they support healthier body composition and recovery.

Benefits:

Supports muscle growth, visceral fat loss, recovery, and healthy aging without disrupting other hormones.

Side Effects:

It is important that you follow the dose and administration instructions as listed. You may experience mild injection site redness or tenderness, temporary flushing, increased hunger, or fatigue. Rarely, headaches or water retention. If any of these symptoms become severe, contact us and let the medical team know.

IMPORTANT

1-3 months ON, 1 Month OFF

PM before bed

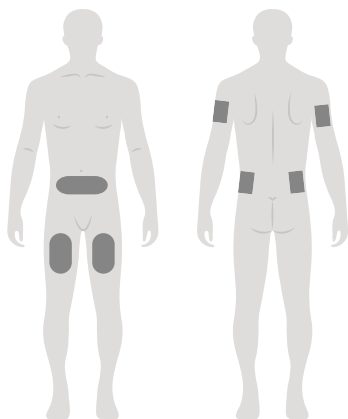

5 days on 2 days off (1-2x per day)

Inject 20 units, SQ

Refrigerate

Injection Site:

Use an alcohol swab on the top of the vial and at the site of injection before use. Work in a clockwise fashion around the belly button to ensure the prior injection sites have healed, avoiding tender areas. Other subcutaneous area shown to the left.
