

PEPTIDE

BPC - 157

Description:

BPC -157 is a peptide derived from a naturally occurring peptide that has gained attention for its therapeutic effects in promoting healing and tissue repair by stimulating the formation of new blood vessels, promoting cell proliferation, and reducing inflammation.

Benefits:

Speeds up recovery from injuries, supports joint and tendon health, and helps protect against further damage.

Side Effects:

It is important that you follow the dose and administration instructions as listed. Mild redness or tenderness at the injection site. Rarely, nausea, dizziness, or mild digestive discomfort may occur. If any of these symptoms become severe, contact us and let the medical team know.

IMPORTANT

1-3 Months ON, 1 Month OFF

Take Daily

AM or PM, Be consistent

INJECT 10 UNITS, SQ

REFRIGERATE

Injection Site:

Use an alcohol swab on the top of the vial and at the site of injection before use. Work in a clockwise fashion around the belly button to ensure the prior injection sites have healed, avoiding tender areas. Other subcutaneous area shown to the left.
