

PEPTIDE EPITHALON

Description:

Epithalon is known for its potential anti-aging and longevity-promoting properties. It has been studied for its ability to support telomere lengthening, enhance cellular regeneration, and potentially improve sleep quality, immune function, and overall vitality.

Benefits:

Supports healthy aging by improving sleep quality, boosting immune function, and promoting cellular regeneration for overall vitality.

Side Effects:

It is important that you follow the dose and administration instructions as listed. Epithalon is generally well tolerated. Mild injection site irritation, temporary redness, or slight fatigue may occur. Rarely, headaches or mild dizziness have been reported. If any of these symptoms become severe, contact us and let the medical team know.

IMPORTANT

20 Days, 2-3x / Year

PM before bed

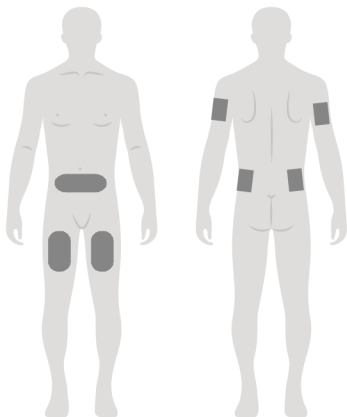

Take Daily

Inject 20 units, SQ

Refrigerate

Injection Site:

Use an alcohol swab on the top of the vial and at the site of injection before use. Work in a clockwise fashion around the belly button to ensure the prior injection sites have healed, avoiding tender areas. Other subcutaneous area shown to the left.
