

# PEPTIDE GHK-CU

## Description:

GHK-Cu is known for its powerful regenerative and anti-inflammatory properties. It supports collagen and elastin production, improves wound healing, and promotes healthier, firmer skin. It's also shown to help with tissue repair, hair growth, and overall skin vitality.

## Benefits:

Boosts collagen and elastin production, enhances skin firmness and healing, and supports tissue repair and hair growth.

## Side Effects:

It is important that you follow the dose and administration instructions as listed. Mild redness or burning at the injection site may occur and typically resolves quickly. Rarely, users may experience mild fatigue, dizziness, or temporary skin irritation. If any symptoms become severe or persistent, stop use and contact our medical team.

## IMPORTANT

1-3 Months ON 1 Month OFF

AM or PM, Be consistent

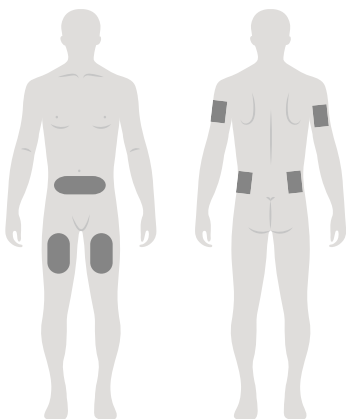

Daily

Inject 10 units, SQ

Refrigerate

## Injection Site:

Use an alcohol swab on the top of the vial and at the site of injection before use. Work in a clockwise fashion around the belly button to ensure the prior injection sites have healed, avoiding tender areas. Other subcutaneous area shown to the left.
