

GLOW

BPC-157/TB-500
GHK-CU

Description:

This Blend combines three peptides to support skin health, healing, and recovery. **GHK-Cu** boosts collagen and skin regeneration, **BPC-157** aids tissue repair and gut health, and **TB-500** speeds muscle and joint recovery by enhancing cell growth and blood flow.

Benefits:

Promotes radiant skin, faster healing, and improved recovery by boosting collagen, reducing inflammation, and supporting muscle and joint health.

Side Effects:

It is important that you follow the dose and administration instructions as listed. A mild burning sensation at the injection site is common and may persist temporarily. Rarely, nail beds turning blue may indicate copper toxicity and should be addressed immediately. If any of these symptoms become severe, contact us and let the medical team know.

IMPORTANT

1-3 Months ON 1 Month OFF

AM or PM, Be consistent

5 days on 2 days off

Inject 15 units, SQ

Refrigerate

Injection Site:

Use an alcohol swab on the top of the vial and at the site of injection before use. Work in a clockwise fashion around the belly button to ensure the prior injection sites have healed, avoiding tender areas. Other subcutaneous area shown to the left.
