

PEPTIDE

IGF-LR3

Description:

IGF- LR3 is a growth factor that supports muscle and bone repair, recovery, and growth. Its enhanced formula lasts longer in the body, making it highly effective for building lean muscle and improving performance.

Benefits:

Boosts muscle growth, speeds recovery, and supports strength and endurance.

Side Effects:

It is important that you follow the dose and administration instructions as listed. Mild redness or tenderness at the injection site is common. Some may experience headaches, fatigue, or nausea. Rarely, changes in blood sugar levels or joint discomfort can occur. If any of these symptoms become severe, contact us and let the medical team know.

IMPORTANT

2 Weeks ON 2 Weeks OFF

AM before Workout

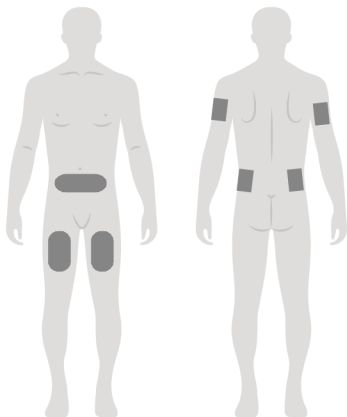

5 days per week (*ideally on workout days*)

Inject 10 units, SQ

Refrigerate

Injection Site:

Use an alcohol swab on the top of the vial and at the site of injection before use. Work in a clockwise fashion around the belly button to ensure the prior injection sites have healed, avoiding tender areas. Other subcutaneous area shown to the left.
