

PEPTIDE MOTS-C

Description:

MOTS-C supports mitochondrial function for energy production and cellular health. It helps regulate metabolism, improve insulin sensitivity, and boost endurance, while potentially protecting against age-related metabolic and cardiovascular decline.

Benefits:

Boosts metabolic health, increases energy, and supports healthy aging and cardiovascular function.

Side Effects:

It is important that you follow the dose and administration instructions as listed. Mild burning or redness at the injection site may occur. Some may experience light sensitivity, temporary fatigue, or mild nausea. These effects are usually temporary. If any of these symptoms become severe, contact us and let the medical team know.

IMPORTANT

1 Month, 2-3x / Year

AM

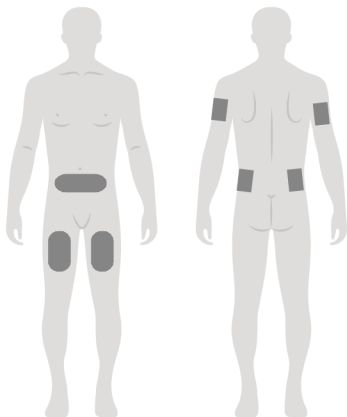

2x per week (ex: *Mon and Thurs*)

Inject 50 units, SQ

Refrigerate

Injection Site:

Use an alcohol swab on the top of the vial and at the site of injection before use. Work in a clockwise fashion around the belly button to ensure the prior injection sites have healed, avoiding tender areas. Other subcutaneous area shown to the left.
