

PEPTIDE

SS-31

Description:

SS-31 is a small peptide designed to protect and restore the health of your mitochondria—the “powerhouses” of your cells that produce energy. By reducing oxidative stress and improving the efficiency of energy production, SS-31 helps support overall cellular health.

Benefits:

improved energy levels, protection against age-related cellular damage, and support for tissues that rely heavily on energy, like the heart, muscles, and eyes.

Side Effects:

It is important that you follow the dose and administration instructions as listed. Mild redness or tenderness at the injection site is most common. Rarely, temporary dizziness, nausea, or fatigue may occur. These effects are typically short-lived. If any of these symptoms become severe, contact us and let the medical team know.

Daily

Inject 20 Units SQ

Refrigerate

Injection Site:

Use an alcohol swab on the top of the vial and at the site of injection before use. Work in a clockwise fashion around the belly button to ensure the prior injection sites have healed, avoiding tender areas. Other subcutaneous area shown to the left.
