

PEPTIDE THYMOSIN ALPHA 1

BEYOND WELLNESS

Description:

Thymosin Alpha 1 (Ta1) is a naturally occurring peptide that supports immune regulation and balance. It helps enhance T-cell function, supports immune resilience, and assists the body in managing inflammation and recovery, especially during periods of immune stress.

Benefits:

Strengthens immune response, supports overall immune balance, reduces inflammation, and promotes resilience in those with weakened immune systems.

Side Effects:

It is important that you follow the dose and administration instructions as listed. You may experience, although it is rare, mild fatigue, mild dizziness, and fatigue at the start of your treatment. If any of these symptoms become severe, contact us and let the medical team know.

IMPORTANT

10 days or 1-3 Months ON 1 Month OFF

AM or PM, Be consistent

Acute sickness/infection/or quick immune boost: Daily for 10 days
Chronic infections/autoimmune: 3x / week

Inject 10 units SQ

Refrigerate

Injection Site:

Use an alcohol swab on the top of the vial and at the site of injection before use. Work in a clockwise fashion around the belly button to ensure the prior injection sites have healed, avoiding tender areas. Other subcutaneous area shown to the left.
